WORK EXPERIENCE

Associate Software Engineer

Dec 2025 – Present

Speshway Solutions

- Developed approximately 40 screens for a Fleet Management web application using React.js, Node.js, Express.js, and MongoDB as part of a 3-member development team.
- Built Driver, Admin, Trips, Live Tracking, and public-facing modules, covering both driver and administrator workflows.
- Designed UI/UX screens in Figma and converted them into responsive, functional React.js interfaces.
- Developed and integrated REST APIs with Node.js and Express.js to connect frontend modules with backend services.
- Implemented CRUD operations and database functionality in MongoDB for trips, drivers, and admin data.
- Participated in daily development meetings and collaborated with team members across design, development, and integration.

PROJECTS

Grocery Delivery Application (Web + Mobile)

Tech Stack: MongoDB, Express.js, React.js, Node.js, Flutter, Dart, Figma

- Built a multi-role grocery platform from scratch as an individual project, with separate Customer, Admin, and Delivery Partner dashboards on web.
- Developed Flutter mobile applications for Customers and Delivery Partners and integrated them with the shared REST API backend.
- Implemented product management, orders, delivery, refunds, returns/exchanges, order cancellation, and festival offers with theme setups.

- Handled the full workflow end to end: UI/UX design in Figma, frontend, backend, API integration, and MongoDB database design.

Event Management Application

Tech Stack: MongoDB, Express.js, React.js, Node.js, Figma

- Developed a full stack event management application end to end as an individual project, from requirements and Figma design through implementation.
- Built dashboards and workflows for event creation, event bookings, and event date scheduling.
- Developed REST APIs with Node.js and Express.js and implemented CRUD operations in MongoDB.
